

## IMPUTATION FUND

FACTS & UPDATE  
December 2009

### Fund objective

In its management of the Imputation Fund ("the Fund"), Trust seeks to provide you with exposure to a selection of securities listed on the Australian share market which have the ability to increase their dividend payments over time.

The aim of the Fund is to outperform its benchmark, the S&P/ASX 200 Accumulation Index, over rolling three-year periods.

### Present strategy

We continue to manage the Fund in line with our long established value-based investment philosophy. In the management of the investment portfolio Trust seeks to:

- deliver a tax effective income stream that has the potential to grow over time
- generate capital growth over the longer term
- maintain a consistent, conservative investment style
- reduce risk through investing in a diversified portfolio of Australian companies from a range of industry sectors.

### Risk and return profile

The price of securities listed on the Australian Stock Exchange can be extremely volatile, and may fall as well as rise. That volatility will be directly reflected in the price of units in this Fund. Investors in this Fund should have a time frame of five or more years.

### Investment style

Trust, as investment manager of the Fund, employs a value-based investment style. The investment process for the Fund portfolio involves a comparison of securities against the following criteria:

- a track record of paying dividends
- the underlying strength to continue to pay and increase those dividends
- reasonable price earnings multiples
- sound debt-to-equity ratios
- industry structure
- quality of management.

## Key features

Size as at 31 December 2009	\$153.38 million
