

TRUST CASH MANAGEMENT FUND

FACTS & UPDATE
June 2009

Fund objective

The Trust Cash Management Fund ('the Fund') aims to achieve a very high level of security of capital, give investors a market competitive interest return, and provides access to funds at call.

Risk and return profile

The Fund invests in bank accepted bills of exchange and negotiable certificates of deposits issued by a bank and government guaranteed securities with a maturity date of two years or less. While liquid assets such as these are not guaranteed by Trust, they are regarded as one of the most secure asset classes. The Fund is suitable for Investors seeking:

- security of capital
- funds payable at call
- market competitive interest rates.

Investment style

The Fund invests in highly liquid short term securities, that is, securities which have a maturity date of not more than two years at the date of acquisition and which meet the following criteria:

- government securities of the Commonwealth or a state
- securities of a public statutory body of the Commonwealth or any state, if those securities are guaranteed by the Commonwealth or a state
- negotiable certificates of deposit with an Australian bank
- bills of exchange which have been endorsed or accepted without qualification by an Australian bank.

Present strategy

The managers of the Fund select and manage securities to maximise returns based on their expectations for future moves in money market interest rates. The securities are also selected to ensure they fit within the counterparty limits set for the Fund.

Key features

Size as at 30 June 2009	\$459.73 million
